HealthySteps Online Courses

These courses are essential for you and your team, providing foundational information about the innovative HealthySteps approach—how it is designed, based on scientific understandings of early childhood development, and how it supports babies, toddlers, and their families.

Our online courses can be completed independently and can be used to introduce new team members to the HealthySteps model or as a refresher on the HealthySteps approach any time it's needed.

Having a full understanding of the “why” and “what” of HealthySteps will benefit everyone in your practice and ultimately the babies, toddlers, and families you serve.
